Ultra Deshedding & Detangling

Say goodbye to excess undercoat

WHAT IS DESHEDDING?

Deshedding is a grooming process that helps remove the excess undercoat — the layer of loose hair that often causes shedding around the house. By eliminating this dead fur, deshedding not only keeps your home and grooming salon cleaner but also improves airflow to the skin, reduces tangles, and promotes a healthier, shinier coat.

Now, deshedding care is even more effective with Hydra® Ultra Deshedding and Detangling — **specially developed for dogs and cats of all coat types!**

ULTRA DESHEDDING & DETANGLING SHAMPOO

- **Gently removes excess undercoat** while delivering deep hydration.
- **Helps detangle knots** and leaves the coat soft, healthy, and easy to manage.
- Perfect for **all coat types** — for dogs and cats.

ULTRA DESHEDDING & DETANGLING CONDITIONER

- **Enhances the deshedding** effect by deeply nourishing the coat.
- **Facilitates detangling** and smooth brushing.
- **Ideal for all coat types** — suitable for both dogs and cats.
